

DEDICATED TO DISCOVERY

ELGA LabWater are specialists in the engineering, service & support of water purification systems.

Unrivalled product design has achieved international recognition and awards.

Worldwide technical service teams support prestige science, healthcare & industrial organizations globally.

A global supply chain supports clients from regional centres on every continent. ELGA is part of the world's largest environmental services organisation: Veolia.

PUREENERGY30

Compact. Reliable. Proven.

Hydrogen: essential for a low carbon future

Green hydrogen is produced using sustainable electricity sources combined with proton electrolyte membrane (PEM) water electrolysis.

WATER PURITY IS CRITICAL FOR EFFICIENT GREEN HYDROGEN PRODUCTION

Lowering the cost of hydrogen production means maximising the efficiency of the electrolysis process.

PEM, using an acidic electrolyte requires purified water to avoid deterioration of catalysts and membranes due to the impact of organics & transition metals.

Within PEM hydrogen production, ions, particles and organics all have the potential to adhere to the surface of an electrode.

Surface contamination can either reduce process efficiency, cause damage or shorten equipment life span, all of which can increase hydrogen production costs. As such, a consistent supply of purified water is essential for efficient PEM hydrogen production.

ELGA Veolia, purified water in mission critical applications worldwide

ELGA & Veolia provide ultrapure water expertise to prestige life science, clinical, academic, industrial and research organizations globally.

Water Resistivity	>1MΩ.cm
Total Organic Carbon (TOC)	<50ppbC*
Make Up Rates	Up to 30 litres per hour
Daily Output	Up to 720 litres
Hydrogen Produced by Electrolyser	30Nm³/h

*Feedwater dependant

PUREENERGY30

The PUREENERGY 30. Compact, reliable & proven globally

The PUREENERGY 30 is a compact, high performance water purification system for PEM Electrolyser Systems with purified water demands of up to 30 l/hour. Guaranteed water purity, space saving design and simple maintenance, makes the PUREENERGY 30 an ideal solution to feed hydrogen Electrolyser Systems producing up to 30Nm³/h of hydrogen.

Compact

550mm wide and 460mm height. Wall mountable, optional docking vessel - saving valuable space

Eco-aware

The EDI technology minimizes environmental impact

Reliable

ELGA Veolia 's extensive experience in mission critical environments means reliability is tested, proven and unrivalled

Easy to Use

A near plug & play installation process combined with automated monitoring & alarms enables a simple set up & operation

Guaranteed Water Purity

Regular recirculation through the system's purification technologies ensure the water specification is maintained

Simple Maintenance

The expertise gained from a global installed base delivers an easily serviceable unit

DELIVERING CONSISTENT PERFORMANCE OF HYDROGEN GENERATION ELECTROLYSERS WORLDWIDE

Compact. Reliable. Proven.

Working with green hydrogen innovators world wide

ELGA Veolia's purified water experience will ensure the consistent performance of your hydrogen generation systems.

Maximising electrolyser efficiency, minimising cooling loads & minimising system complexity are all key components in the success of the hydrogen economy.

ELGA & Veolia's global service network enables service packages to ensure the availability & electrolyser efficiency essential for the commercial success of green hydrogen.

ORGANISATIONS
ON THE PLANET**

Unmatched global support & solutions

As part of the Veolia group, the world's largest environmental company, ELGA operates in over 60 countries worldwide, offering local support to cutting edge organisations in industrial, clinical, academic and prestige research organisations globally.

The ELGA / Veolia service offer includes more than 1000 ELGA trained Engineers in over 70 Countries.

The ELGA product range offers water for every pure water requirement, quality which is beyond question, unmatched value and complete adaptability. The ranges are reliable, robust & simple to use and maintain.
